

1. (a) Find  $23 \times 2$ .

(b) Find  $23 \times 3$ .

2. Complete these multiplications.

$$(a) \quad 42 \times 2 = \boxed{\phantom{00}} \times 2 + \boxed{\phantom{00}} \times 2$$

$$= \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$(b) \quad 31 \times 3 = \boxed{\phantom{00}} \times 3 + \boxed{\phantom{00}} \times 3$$

$$= \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$(c) \quad 12 \times 4 = \boxed{\phantom{00}} \times \boxed{\phantom{00}} + \boxed{\phantom{00}} \times \boxed{\phantom{00}}$$

$$= \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

3. Work out the missing numbers.

(a)  $11 \times 2 = \boxed{\phantom{00}}$       (b)  $21 \times 4 = \boxed{\phantom{00}}$       (c)  $32 \times 3 = \boxed{\phantom{00}}$

(d)  $13 \times \boxed{\phantom{00}} = 39$       (e)  $\boxed{\phantom{00}} \times 2 = 24$       (f)  $\boxed{\phantom{00}} \times 4 = 88$

### Challenge

Find the answers.

(a)  $14 \times 3 = \boxed{\phantom{00}}$       (b)  $13 \times 5 = \boxed{\phantom{00}}$       (c)  $27 \times 3 = \boxed{\phantom{00}}$
