

Solving problems with statistics Resource sheet

Josh wants to open a pet shop. He wants to begin by selling six pets.

He wants you to give him an idea of which animals to sell.

Choose ten pets that you think Josh should sell.

Create a tally chart. Ask everyone in your class to choose one of the pets, record their choice in your tally chart.

Draw a bar chart to show your results. The vertical axis should go up in twos.
Remember to label the axes and give your graph a title.
